EDUCATION

Lagos State University, Computer Science and Education — Expected: Aug 2028
CGPA: 4.10

WORK EXPERIENCES

Founder & Developer — Oct 2026 – Present
Muniac Studios

- Founded an independent game development studio and shipped its first title, *Ojuju Calabar*, a first-person 3D Nigerian horror escape game for web and Android.
- Built the game on a lightweight WebGL engine with textures painted in code and synthesised sound, keeping it fast to load on mobile data.
- Designed replayable puzzles that change every game and a live speedrun leaderboard on Supabase with server-side checks on every run.

Frontend Intern — Jul 2026 – Nov 2026
Harvest House

- Built and deployed five responsive websites across industries: a creative studio (Lumina), a SaaS landing page (Nexora), a real estate agency (Haven Estates), an e-commerce store (JCA Store) and a restaurant (Oja).
- Implemented interactive features including product filters, a slide-out cart and checkout, a monthly/yearly pricing toggle, property search and table reservations.
- Turned each brief into a full page structure with clear calls to action, from hero and services through to FAQs, contact and booking forms.

Captain & Lead — Jan 2025 – Present
Monarchs of Gaming (MOG) eSports

- Captain and lead the MOG roster in competitive mobile esports, including ECS Division Three matchdays.
- Built StrikeRank, a ranking system that tracks each player's strengths, weaknesses and performance across team sessions.

LASU Community Manager — Nov 2024 – Present
Carry1st — Lagos State University

- Manage Carry1st's student gaming community at Lagos State University, keeping members engaged and connected to the brand.

PROJECTS

StrikeRank — Blood Strike team rank system. Link — 2026

- Players paste match scoreboards; the site parses kills, assists, deaths, damage and placement into an Ego Score out of 10,000 and a live leaderboard.
- Scores built from averages, consistency and recent form, with a sample multiplier and admin verification so one lucky game can't top the ladder.

Ojuju Calabar — 3D horror escape game, Muniac Studios. Link — 2026

- Seven rooms and a roof with puzzle chains, a journal, fourteen memory pages and comic-strip memories; ships as a web game, Android app and CrazyGames build.

SKILLS

Game development, 3D design, web design, frontend development, Python, generative AI engineering, community management, leadership.

Tools: VS Code, Codex, Claude Code, GitHub, Supabase, Netlify, Vercel.

INTERESTS

Game development, competitive esports, generative AI, Nigerian storytelling in games.
